Hard science and soft science are colloquial terms used to compare scientific fields on the basis of perceived methodological rigor, exactitude, and objectivity. Roughly speaking, the natural sciences (e.g. biology, chemistry, physics) are considered "hard", whereas the social sciences (e.g. economics, psychology, sociology) are usually described as "soft".

"When I found Integrative Health Matters, I was a year into what I would later discover — with their help — was Lyme Disease. They truly do care for their patients and are more than happy to discuss and brainstorm with them rather than just throw pills at the problem. I am so grateful for their continued support through my treatment, they truly are invaluable."
