

Nanofabrication Zheng Cui

Nanofabrication Zheng Cui

Progress in robotics over the past years has dramatically extended our ability to explore the world from perception, cognition and manipulation perspectives at a variety of scales extending from the edges of the solar system down to individual atoms.

ABOUT THIS HANDBOOK: Handbook of Organic Electronics and Photonics brings together chemists, materials scientists, physicists, and engineers from both academia and industry to share information on the organic materials for emerging new electronic and photonic technologies. The three volume set offers exclusive coverage on all types of organic molecular and polymeric functional materials, their ...

Handbook of Organic Electronics and Photonics,

The Texas Chapter of Chinese Association for Science and Technology (CAST-TX), founded in 1999 in Dallas, Texas, is a local chapter of the Chinese Association for Science and Technology (CAST-USA) which is headquartered in the New York City. CAST-TX now has about 400 members spread over its divisions in Dallas, Austin, Houston and San Antonio.

CAST STEM bridge

Li-S batteries have attracted considerable attention because of the natural abundance of sulfur and the high theoretical energy of 2,500 Wh kg⁻¹. This is enabled by the reversible conversion reaction between sulfur and Li₂S via a series of lithium polysulfide intermediates. The poor electronic conductivity of Li₂S imposes a large impedance in the cells and the dissolution-precipitation ...

Dr. Hua Zhang obtained his B.S. and M.S. degrees at Nanjing University in China in 1992 and 1995, respectively, and completed his Ph.D. with Prof. Zhongfan Liu at Peking University in China in July 1998. He joined Prof. Frans C. De Schryver's group at Katholieke Universiteit Leuven (KU Leuven) in ...

In the United States, one name is added to the organ transplant waiting list every 15 min (Abouna, 2008). While this list grows rapidly, less than one-third of waiting patients can receive matched organs from donors (Ozolat and Yu, 2013). This growing deficit, however, is unlikely to be met by a supply of transplantable organs that has stagnated over the last decade (Bajaj et al., 2014).

3D bioprinting for engineering complex tissues - ScienceDirect

New materials, namely high-k (high-permittivity) dielectrics to replace SiO₂, Cu to replace Al, and barrier materials for Cu, are revolutionizing modern integrated circuits. These materials must be deposited as very thin films on structured surfaces.
