

Solaris 10 System Administration Exam Cx 310 200 Cx 310

Solaris 10 System Administration Exam

The equivalent Unix command used by the Process Manager to terminate a process is shown here: # kill -9 <PID> <PID> is the process ID of the selected process. The preap command forces the killing of a defunct process, known as a zombie. In previous Solaris releases, zombie processes that could not be killed off remained until the next system reboot.

Using Signals | Solaris 10 System Administration Exam Prep ...

Viewing a Process. Objective: Explain how to view system processes. Solaris is a multitasking environment in which a number of programs run at the same time.

"This book is a comprehensive accumulation of previous year question papers with detailed explanations. It helps aspirants to make a complete preparation of the exam."

Dreamtech Press- Books & Education Solutions

On modern hardware with 32GB memory or more swap space is rarely used for its primary purpose. But Solaris has a very elegant idea of linking swap space and /tmp. In other words /tmp in Solaris is memory based filesystem and files in it disappear on reboot. That means that it is important for Solaris administrators to understand the features of the Solaris swap.
