Disparities in per-student funding levels are actually greater within some states than among the states as a group. To illustrate, in 1998, public school districts in Alaska that were ranked at the 95th percentile for per-student funding received an average of \$16,546 per student for the year, whereas school districts ranked at the 5th percentile received only \$7,379 on average.

An intelligence quotient (IQ) is a total score derived from several standardized tests designed to assess human intelligence. The abbreviation "IQ" was coined by the psychologist William Stern for the German term Intelligenzquotient, his term for a scoring method for intelligence tests at University of Breslau he advocated in a 1912 book. Historically, IQ is a score obtained by dividing a ...

The Ebert test gauges whether a computer-based synthesized voice can tell a joke with sufficient skill to cause people to laugh. It was proposed by film critic Roger Ebert at the 2011 TED conference as a challenge to software developers to have a computerized voice master the inflections, delivery, timing, and intonations of a speaking human. The test is similar to the Turing test proposed by ...

1. Introduction. Social commerce developed in tandem with the e-commerce evolution. It was introduced by Yahoo in 2005, and quickly became a means for adding value to commercial services through the use of customer engagement by major web companies, such as Amazon, Groupon and eBay (Wang and Zhang, 2012). In 2006, the first academic article appeared that explicitly used the term social commerce.
