

Textile Design In The Digital Age

Textile Design In The Digital

Textile design is essentially the process of creating designs for woven, knitted or printed fabrics or surface ornamented fabrics. Textile designers are involved with the production of these designs, which are used, sometimes repetitively, in clothing and interior decor items.

Textile design - Wikipedia

Current Technology. Digital textile print production would not be possible without improvements in inkjet printhead technology. Beginning in the 1990's with the Epson DX-4 incorporated into the Mimaki TX-2 printer, printhead manufacturers continue to advance the technology both in terms of the number of nozzles per channel as well as firing frequencies.

Textile Design - Glasgow School of Art

Textile printing is the process of applying colour to fabric in definite patterns or designs. In properly printed fabrics the colour is bonded with the fibre, so as to resist washing and friction. Textile printing is related to dyeing but in dyeing properly the whole fabric is uniformly covered with one colour, whereas in printing one or more colours are applied to it in certain parts only, and ...
