If it weren't for ossification, you'd be a soft mound of blood, water, and flesh. The process of creating and growing bones is complicated, interesting, and chock-full of vocabulary that you need to know to get through an anatomy or physiology class. Compact bone is a dense layer made up of structural units, or lacunae, [...]

A common treatment method for preventing iodine-131 exposure is by saturating the thyroid with regular, non-radioactive iodine-127, as an iodide or iodate salt. Free elemental iodine should not be used for saturating the thyroid because it is a corrosive oxidant and therefore is toxic to ingest in the necessary quantities. The thyroid will absorb very little of the radioactive iodine-131 after ...
