Home Page | California State Water Resources Control Board

Water resources are natural resources of water that are potentially useful. Uses of water include agricultural, industrial, household, recreational and environmental activities. All living things require water to grow and reproduce. 97% of the water on the Earth is salt water and only three percent is fresh water; slightly over two thirds of this is frozen in glaciers and polar ice caps.

Water resources - Wikipedia

The Water Rooms. The Water Rooms (left/above) is a series of videos developed by UNESCO WWAP on occasion of Expo 2015 to encourage learning about water resources and their sustainable management.

UN-Water: World Water Day - Resources

The Middle East has experienced many environmental concerns lately. Water resources are becoming increasingly scarce, especially for the millions there who already lack access to sanitary water. Some of these countries, including Yemen, the United Arab Emirates, Saudi Arabia, and Iraq, are facing unique problems that require global, immediate attention.
